venturelab
World-class startups. Swiss made.

«AIT is the perfect program to take a step out of the lab into the real world. It provides young researchers with the first tools and connections to start global and dream big!»

Clément Javerzac, EPFL student and founder MiraEX, AIT participant 2017-8

The AIT program aims to support scientists in **transforming their applied research into market application** and discovering their entrepreneurial potential.

- **Improve** market application by validating their ideas with peers, experts and potential customers.
- **Engage** with researchers and entrepreneurs with a similar background

By connecting scientists from top institutions in Switzerland and India, the program promotes an international network and enables access to one of the most promising markets and intellectual capitals in applied research.

Being selected for this program offers researchers a unique opportunity to:

- **Develop** a better understanding of the industry environment and establish connections and first partnerships in the untapped Indian market.
- **Access** a wide network of peers, mentors and industry experts and acquire tools and skills to analyse the application of their research.
- **Boost** the recognition of your innovation
- **Connect** to high-level researchers in their field from Switzerland and India.

to learn how they transformed their research into a high-quality and high potential market product and learn about their business practices.

- **Become** pioneers of an Indo-Swiss applied researcher's community.
